29 July 2021

JUNE 2021

QUARTERLY ACTIVITIES & CASHFLOW REPORT

The Company actively explored funding options and potential co-operation opportunities relating to the funding of future work programs, principally for the Copper Hill Project during the Quarter. But the lockdowns and other restrictions imposed as a result of COVID-19 had hampered the Company's efforts and making capital raising very difficult due to, among other things, cancellation of face-to-face meetings with, and on-site due diligence exercises by, potential financiers.

During the June 2021 Quarter, the Company's operating costs were supported by ongoing funds from Martin Place Securities as part of agreed facilities. A further $50,000 funding was provided in the quarter to 30 June 2021. Additional funds were realised from sales of surplus and non-core assets.

Martin Place Securities and the management have been actively working together to satisfy the funding requirements for requotation of GCR shares for trading on the ASX. More capital raisings are also planned once the current suspension of trading is lifted.

Part of the Company's capital raising efforts has eventually yielded results subsequent to the end of the June Quarter as the Company managed to conclude an agreement with a new financier to provide $1,800,000 in long-term loan funds, the whole amount of which has now been received. The Company continues to work on other funding opportunities. Further details on funding arrangements and corresponding work expansion strategy will be released to the market in due course.

The main activity on the Company's project portfolio continues to be focused on evaluation of existing data, research of new exploration techniques, and assessment of development pathways for its flagship project, the Copper Hill copper-gold porphyry deposit.

Some State government departments have announced a range of concessions to resource projects during 2020 and into 2021 in response to the impact of Covid-19 restrictions on exploration activity. These include deferrals and waivers on tenement fees and expenditure commitments. Activities in June 2021 continued to experience disruption from new Covid 19 outbreaks and resultant limitations on cross border travel.

An updated review of current projects is provided in the following pages.

For personal use only

REVIEW OF PROJECTS

The Golden Cross Resources Limited (GCR) portfolio of projects is diversified both by commodity and by geological province (**Figure 1**). It includes projects located in well-established mineral provinces where prospectivity is underlined by significant operating mines and known mineral deposits:

- ❖ Palaeozoic Lachlan Fold Belt in New South Wales (NSW)
  - Macquarie Arc Ordovician Porphyry Province - Copper/Gold
  - Silurian VMS Province – Zinc/Copper/Gold
  - Cobar Region – Base Metals/Gold
- ❖ South Australian Gawler Craton - Iron Oxide/Copper/Gold (IOCG)
- ❖ Northwest Queensland – Phosphate/Uranium

The portfolio has been refocused in recent years by divestment of selected non-core properties.

The main objective of the Company is to progress the Copper Hill Project in NSW once additional funding is secured.

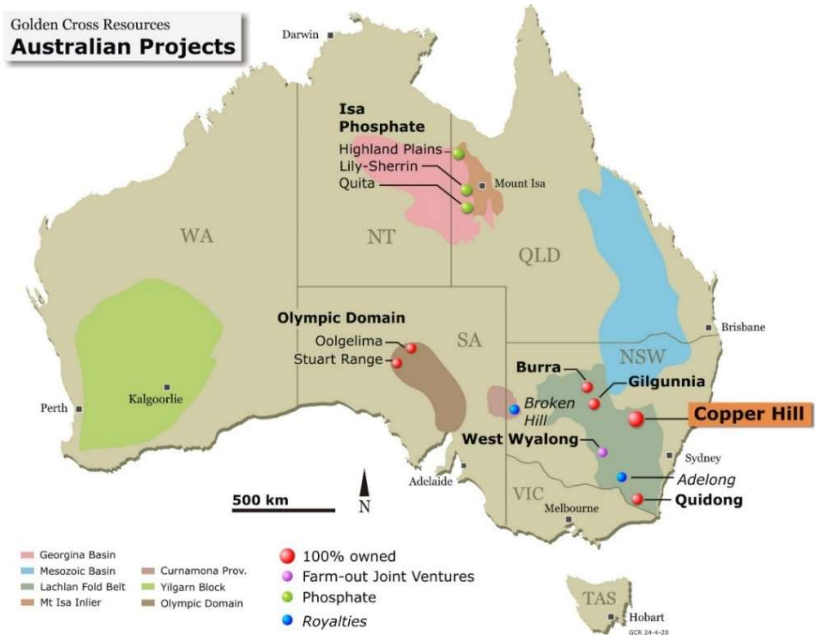

Figure 1: GCR Projects Status Map
[details of current projects are included in the Mineral Tenements Table at end of this report]

Copper Hill

GCR 100%

Copper Hill is within the same Ordovician-age Macquarie Arc volcanic belt (the Molong Volcanic Belt – "MVB") that hosts Cadia-Ridgeway and other significant gold-copper deposits in the Orange region of central NSW.

Copper Hill is approximately 50 kilometres north of Cadia on the northern edge of a structural corridor formed by the interpreted WNW-trending Lachlan Transverse Zone (**Figure 2**). Cadia is one of Australia's larger producing gold mines with annual production of 843,338 ounces gold and 96,042 tonnes copper in FY 2020 from ore grading 1.14 g/t gold and 0.39% copper (*refer Newcrest Quarterly Report June 2020*). In the December 20 Quarter, treated ore grades were 0.95 g/t gold and 0.39% copper. (*refer Newcrest Quarterly Report December 2020*).

Prospectivity of the MVB received a boost when drill results from the Boda Prospect, 60km north of Copper Hill were released in September 2019 (*refer Alkane Resources Ltd ASX announcements on 9 September 2019 and subsequent dates*), sparking a sharp increase in exploration activity the surrounding region.

For personal use only

At Copper Hill the broader low grade mineralised envelope encloses a higher-grade central zone containing of 160,000 tonnes copper and 480,000 ounces gold in a JORC 2012 Resource of 28 million tonnes grading 0.56% copper and 0.53 g/t gold, calculated at a 0.4% copper cut-off (*refer GCR: ASX announcement on 24 March 2015: Copper Hill Resource Estimate, and Table 1 in the Appendix on page 10, detailing Indicated and Inferred resource components).*

Copper Hill was independently valued in 2017 by GEOS Mining Consultants at $14.4 million (*refer GCR: ASX announcement on 21 September 2017*) within a range of $7.6M to $26.6M depending on criteria such as metal prices in 2017. Copper and gold prices have increased approximately 45% for copper and 35% for gold since then.

In April 2015 the Company completed a Scoping Study (*refer GCR: ASX announcement on 15 April 2015*), based around the higher-grade central zone, that identified the additional feasibility work components required to progress towards a mining project, including:

- Drilling to extend high grade zones, provide density data, twin RC holes, clarify structural geometry controlling mineralisation, and provide resource definition data;
- Resource updates utilising additional data from drilling;
- Metallurgical testwork;
- Processing technologies;
- Mining and engineering studies and costing updates;
- Environmental studies and baseline data;
- Water supply sources and usage;
- Land tenure and ownership;
- Permitting at state and local government level.

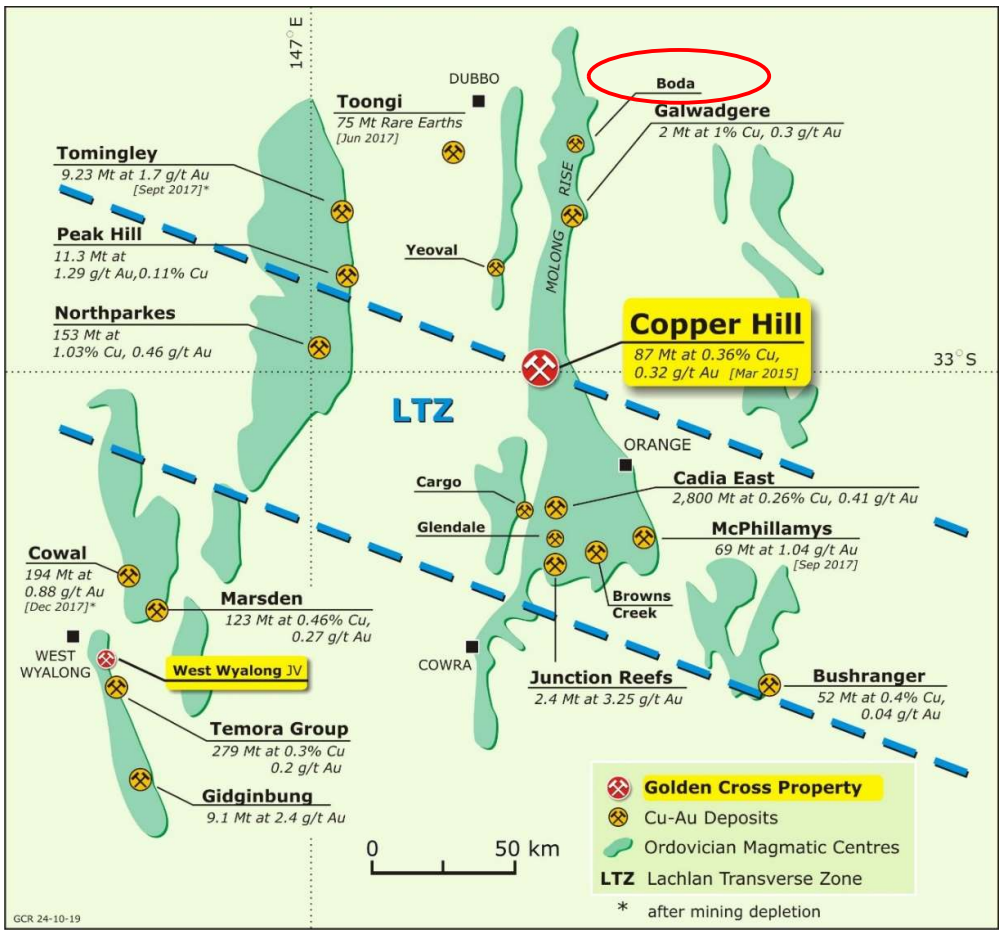

Figure 2: Copper Hill on NSW Porphyry Provinces

During the June 2021 Quarter, Golden Cross continued to examine initiatives to progress exploration and development that underpin components of the proposed PFS, specifically:-

- Land tenure, ownership and access, community consultation;
- Review of metal zonings within the deposit and previous metallurgical work;
- Baseline environmental data;
- Permitting requirements at local government level;
- Quantitative mineralogy research study to identify the complete mineralogical suite in a selection of samples from GCHD470 in the first pass. This data will be useful for mineral zonation work and future metallurgical evaluations;
- Future water sources.

Two research studies supervised by staff at the University of NSW continued but were disrupted by restrictions associated with the Covid-19 pandemic.-

- Relationship between carbonate depletion and soil pH above buried mineralisation, co-ordinated by Neil Rutherford, Rutherford Mineral Resource Consultants. This work may lead to the development of a surface technique for identifying mineral targets under soil cover;
- Biogeochemical pumping of metals to surface, using cypress pine leaves as a sampling medium, following on from similar studies at Golden Cross' Canbelego project and other areas in the Cobar Region.

Copper Hill is sparsely drilled below 350 metres vertically and there is good potential for depth extensions that may be vectored by mineral alteration studies. Occurrences of mineralisation along strike from Copper Hill in a 5-kilometre long corridor have received only shallow previous drilling and provide scope for further resources in satellite deposits.

West Wyalong

JV with Argent Minerals Ltd (ARD). ARD 79.64%; GCR 20.36%*

The West Wyalong project is located immediately north along strike from the Temora Group of porphyry deposits which have total reported resources of 240 Million tonnes grading 0.3% copper and 0.3 g/t gold (*refer Sandfire: ASX announcement on 19 October 2017: Resources & Reserves Statement)*.

GCR diluted its interest in the West Wyalong project to 20.36% as at February 2020 by electing not to contribute to JV expenditure. *Further dilution is expected once updated expenditure figures are provided.

Following a 2,200 station detailed gravity survey on 100 metre spacing, which generated six new targets (*refer Argent ASX announcement on 26 August 2019*), Argent commenced drilling in February 2021 to drill 5 percussion precollars. Argent has reported that one hole has been extended by coring to a depth of 503m, and three intersections 46.8m, 42.8m, and 48.8m of altered hostrock between 230m and 388m downhole, "that may well contain gold and copper mineralisation when assays are available". [*refer Argent ASX announcement 29 March 2021]*.

COBAR REGION
GCR 100%

The Cobar region is well endowed with high grade polymetallic deposits supporting long life mining operations. After divestments, GCR has a residual holding of strategically located tenements (**Figure 5**) in two areas.

Canbelego – along strike from Mt Boppy Goldmine. Further geochemical research consisting of innovative biogeochemical sampling has been completed and results are being evaluated for extension over a wider tenement area.

Gilgunnia – the Kilparney Extended tenement is well located relative to recent exploration and discovery activity in the region. Land access issues that stalled implementation of planned surface work including gravity surveys remain to be resolved. The NSW Geological Survey undertook a regional Airborne EM survey in the region during 2019. Results including infill over EL8270 were released on 30 April 2020 and are being evaluated.

Subject to the availability of funding, GCR is well placed to seek new opportunities based on its long term operating experience in the region.

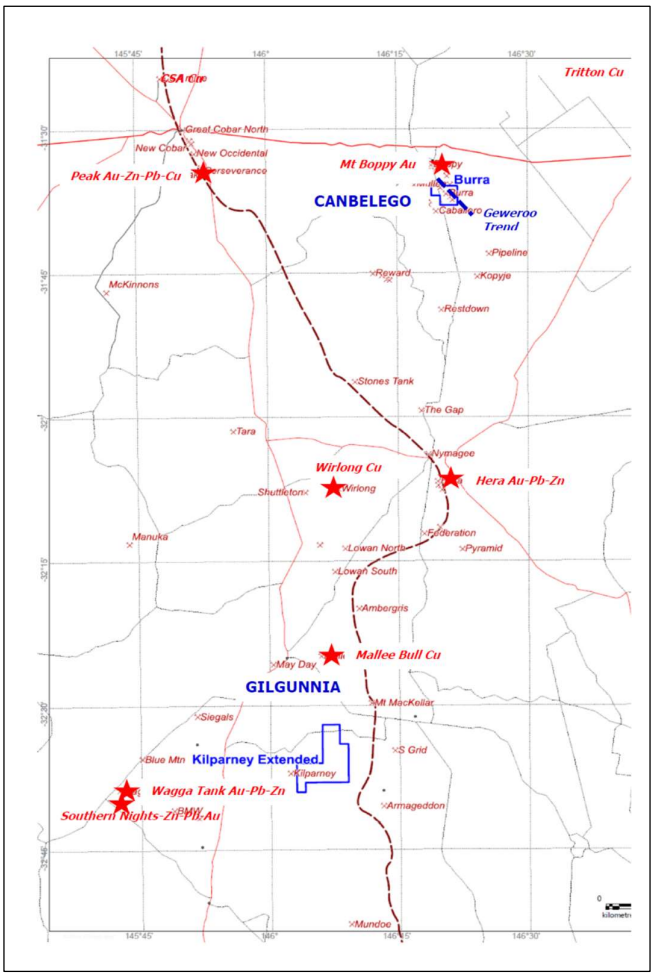

Figure 5: Cobar Region Projects

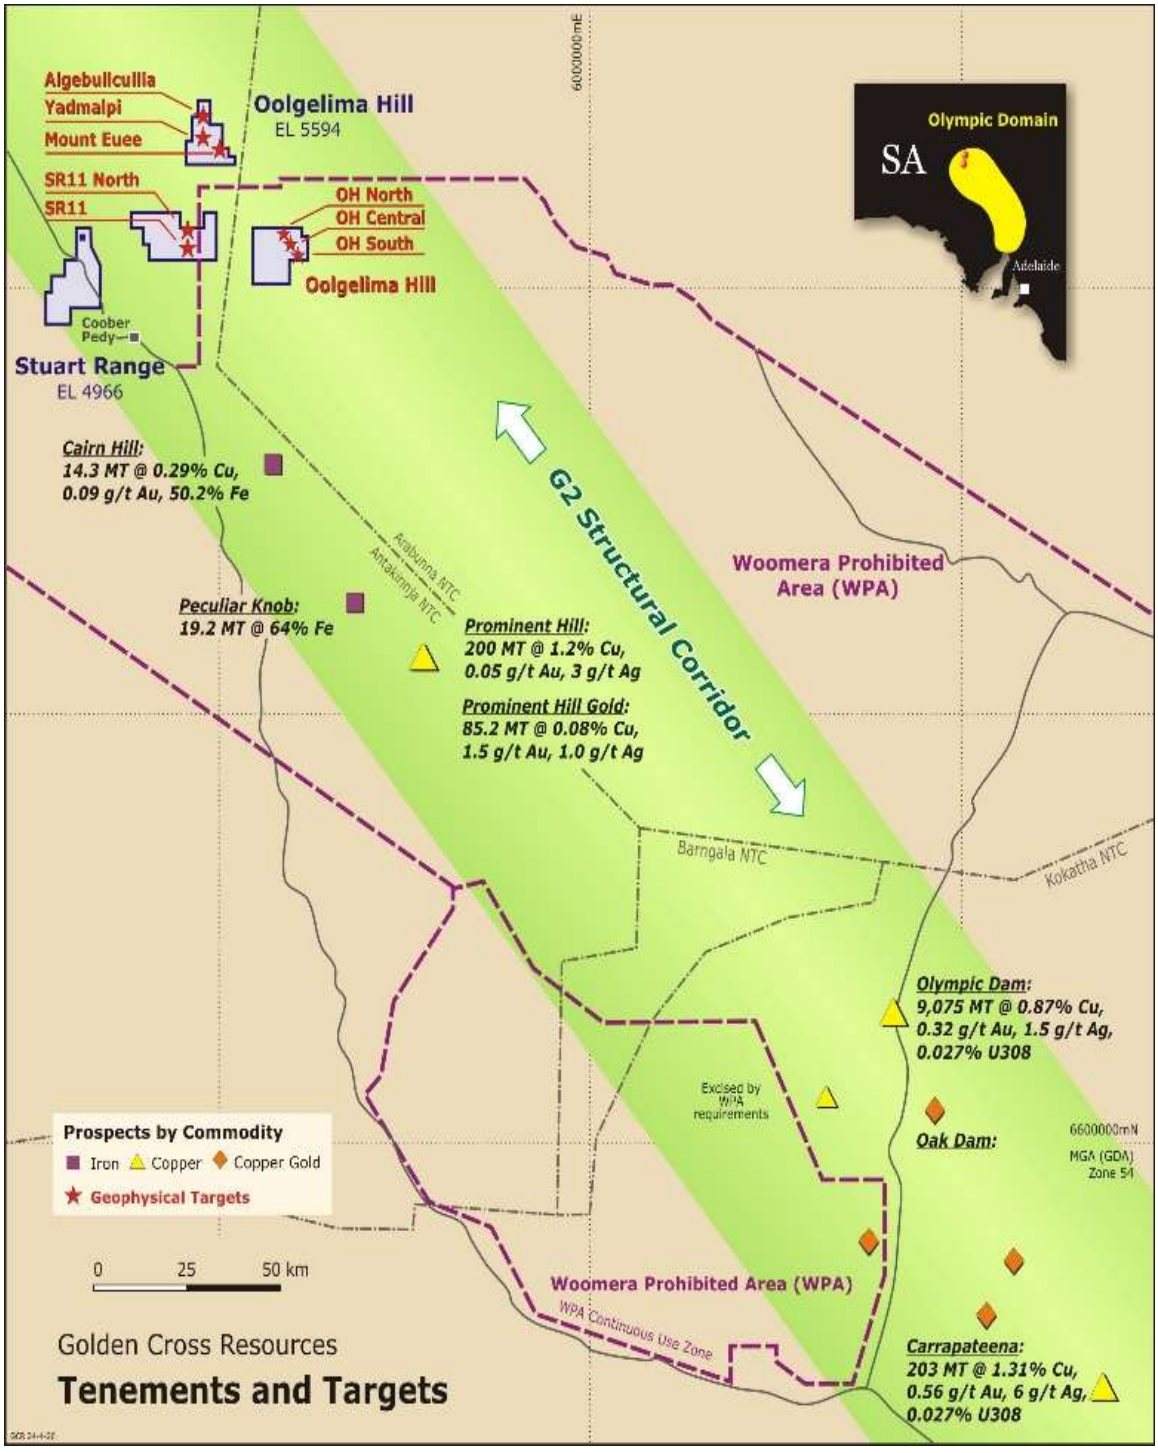
LACHLAN VMS PROVINCE
Silurian formations prospective for volcanic-associated massive sulphide (VMS) deposits extend over 300km from the Orange-Bathurst region in NSW through Woodlawn and Captain's Flat and southwards into eastern Victoria.

Quidong
GCR 100%

Quidong has extensive occurrences of carbonate-hosted zinc/lead and gold mineralisation, and potential intrusive-related gold mineralisation, which occurs elsewhere in the region. Previous data and GCR field reconnaissance have identified high grade zinc-lead-gold drill targets which remain to be tested. Electrical prospecting methods were previously trialled but the large amount of conductive sulphidic rock in the area has rendered the results inconclusive and alternative techniques for refining drill targets are being evaluated.

A core drilling program to test specific geologic targets with up to four staged holes has received government environmental approvals and commencement is subject to land access, drill rig availability, and funding.

SOUTH AUSTRALIA
Iron Ore Copper-Gold (IOCG)
GCR 100%



The Company has identified magnetic/gravity targets near Coober Pedy in South Australia, and three of which have been prioritised for drilling subject to the availability of funding.

The targets are located at the north-western end of the interpreted structural corridor that contains significant copper-gold deposits at Carrapateena, Olympic Dam, Prominent Hill and Cairn Hill (**Figure 4)**.

For personal use only

For personal use only

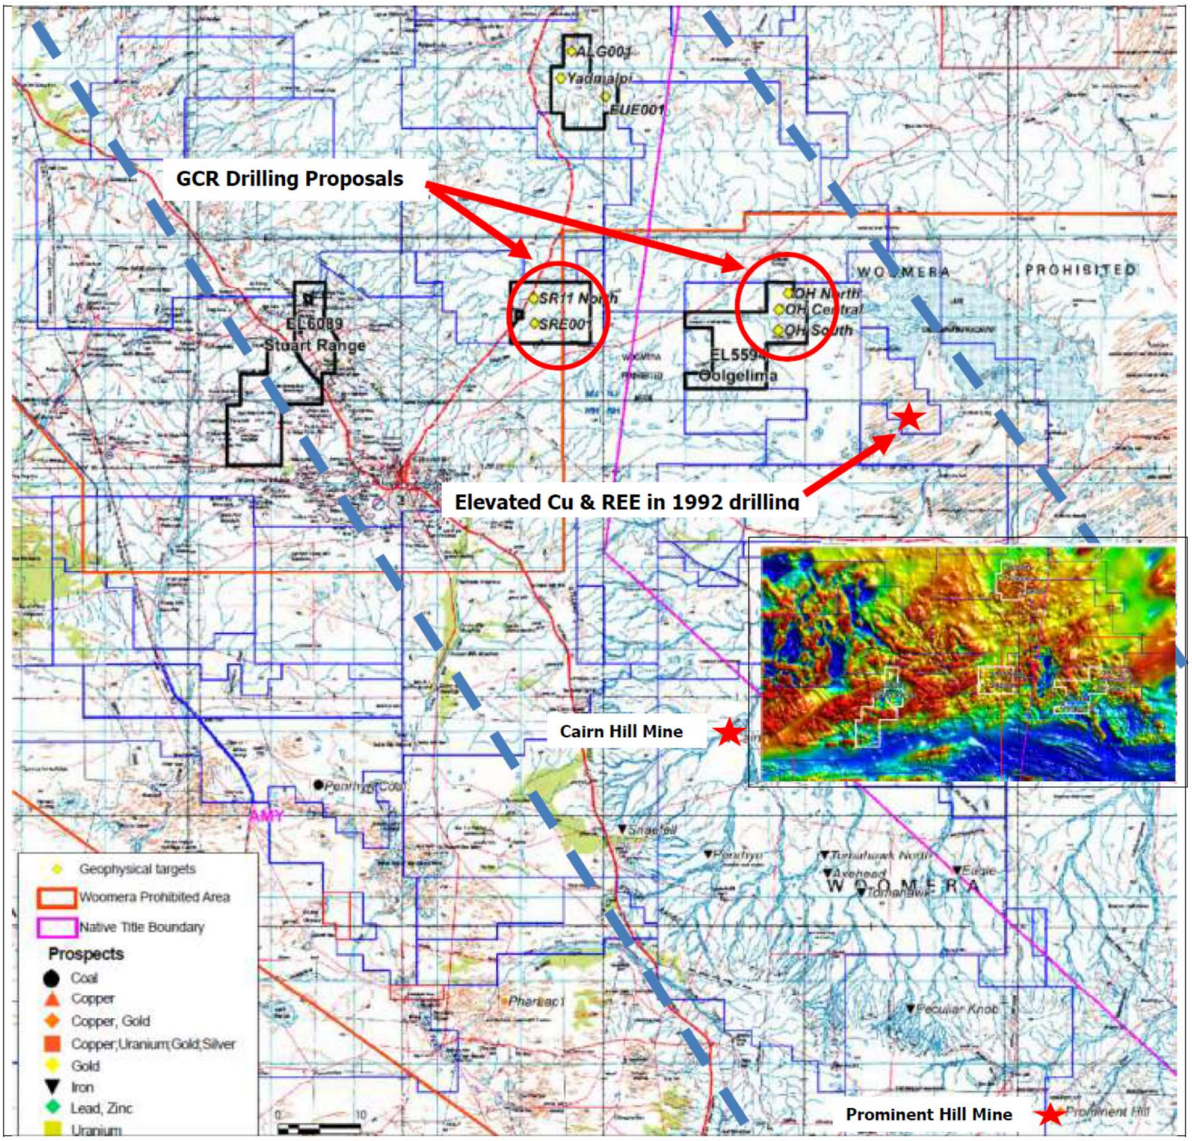


Figure 4: Gawler Craton Projects: Location & Drill Targets
(insert shows targets on magnetic image)

State Government approvals and native title clearances have been received for a proposed 3-hole drill program. Renewal of permits for access to the Woomera Area remain subject to follow-up of the Review of the Woomera Prohibited Area Coexistence Report (Dr Gordon de Brouwer PSM) that was released on 29 March 2019.

Recent exploration activity within the G2 corridor and at the southeastern end provides positive support for prospectivity of the whole corridor (*refer BHP ASX announcements on Oak Dam dated 27 November 2018 and 17 October 2019*).

A renewal application for EL6500 from 27 January 2021 is pending. Golden Cross has sought joint venture interest from Australian explorers to facilitate renewal of access to the Woomera defence area and commencement of the drill program.

For personal use only

ISA PHOSPHATE, QUEENSLAND

GCR subsidiary, King Eagle Resources Pty Ltd (King Eagle), holds 100% of three deposits: Highland Plains, Lily & Sherrin Creek and Quita Creek (**Figure 6**), which account for a third of the historical phosphate resources of the province.

The Highland Plains phosphate deposit extends westwards into the Northern Territory where the western part is held by Gibb River Diamonds Ltd (formerly POZ Minerals Ltd). A maiden JORC 2004 resource for the western part of Highland Plains was announced by POZ on 31 March 2009. In its March 2020 Quarterly Gibb River advised that negotiations for sale of its western part of Highland Plains were ongoing.

The Quita Creek deposit is 25 kilometres southwest from the Ardmore deposit acquired by Centrex Metals Ltd (CXM) in 2017. A definitive feasibility study into development of nearby Ardmore was announced on 28 February 2019, which provides an analogy for progressing Quita Creek if sufficient higher grade and type phosphate resources can be delineated.

During the Quarter compilation and review of the historical data continued to evaluate high grade phosphate zones following recommendations of the data review completed by consultants Orewin Pty Ltd in September 2018. A work program to upgrade the historical Resources to JORC 2012 compliance, is being devised.

Full names for abbreviations are as follows:

GCO	Golden Cross Operations Pty Ltd, a wholly owned subsidiary of GCR
KER	King Eagle Resources Pty Limited, a wholly owned subsidiary of GCR
ARD	Argent Minerals Limited (ASX: ARD)
GCRP	GCR Panama, Inc, a wholly owned subsidiary of GCR
MTI	MapIntec Technologies Inc.

(1) ARD earned 51% in the West Wyalong Joint Venture by spending $750,000 by 1 June 2011. On 21 April 2017 ARD advised additional expenditure totalling $600,000 (for a total expenditure of $1,350,000) by 30 June 2017 was achieved, increasing its JV interest to 70%. Further expenditure by ARD to end of February 2020 has increased its JV interest to 79.64% with GCR diluting to 20.36%. Royal Gold Inc holds a 2.5% net smelter return. Current equities remain to be calculated when updated expenditure figures are provided by Argent.

(2) MapIntec Technologies Inc., a Panamanian company, has a 10% interest free-carried to a decision to mine.

Compliance Statement*: The information in this report that relates to Exploration Results is based on information compiled by Mr Bret Ferris, who is a Member of the Australasian Institute of Geoscientsts (AIG). Mr Ferris is an exploration consultant to, and Acting CEO of, Golden Cross Resources Limited and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Ferris consents to the inclusion in this report of the matters based on that information in the form and context in which it appears.*

The Production Target and the Mineral Resources *on which it is based are extracted from reports released to the ASX by GCR on 24 March 2015 and 15 April 2015. It should be noted that the production target of 2-3Mtpa was based on Indicated Mineral Resources (67%) and Inferred Mineral Resources (33%), and there is a low level of geological confidence associated with Inferred Mineral Resources. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the production target in the report dated 15 April 2015 continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.*

Forward-Looking Statements: *This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although Golden Cross Resources Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.*

Consolidated statement of cash flows		Current quarter $A'000	Year to date (9 months) $A'000
2.2	Proceeds from the disposal of:		
	(a) entities		
	(b) tenements		
	(c) property, plant and equipment		
	(d) investments	50	50
	(e) other non-current assets	52	52
2.3	Cash flows from loans to other entities		(1)
2.4	Dividends received (see note 3)		
2.5	Other (provide details if material)		
2.6	**Net cash from / (used in) investing activities**	**102**	**24**

3.	**Cash flows from financing activities**		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)		
3.2	Proceeds from issue of convertible debt securities		
3.3	Proceeds from exercise of options		
3.4	Transaction costs related to issues of equity securities or convertible debt securities		
3.5	Proceeds from borrowings	51	469
3.6	Repayment of borrowings		
3.7	Transaction costs related to loans and borrowings		
3.8	Dividends paid		
3.9	Other (provide details if material)		
3.10	**Net cash from / (used in) financing activities**	**51**	**469**

4.	**Net increase / (decrease) in cash and cash equivalents for the period**		
4.1	Cash and cash equivalents at beginning of period	26	67
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(130)	(511)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	102	24

For personal use only

Consolidated statement of cash flows		Current quarter $A'000	Year to date (9 months) $A'000
4.4	Net cash from / (used in) financing activities (item 3.10 above)	51	469
4.5	Effect of movement in exchange rates on cash held		
4.6	**Cash and cash equivalents at end of period**	**49**	**49**

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter $A'000	Previous quarter $A'000
5.1	Bank balances	49	26
5.2	Call deposits		
5.3	Bank overdrafts		
5.4	Other (provide details)		
5.5	**Cash and cash equivalents at end of quarter (should equal item 4.6 above)**	**49**	**26**

6.	Payments to related parties of the entity and their associates	Current quarter $A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	(16)
6.2	Aggregate amount of payments to related parties and their associates included in item 2	

Payment of director's fees and a Loan to director's related entity.

For personal use only

7.	**Financing facilities** *Note: the term "facility' includes all forms of financing arrangements available to the entity.* *Add notes as necessary for an understanding of the sources of finance available to the entity.*	**Total facility amount at quarter end $A'000**	**Amount drawn at quarter end $A'000**
7.1	Loan facilities	4,220	4,121
7.2	Credit standby arrangements		
7.3	Other (please specify)		
7.4	**Total financing facilities**	4,220	4,121

7.5	**Unused financing facilities available at quarter end**	99

7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.

A Global Loan Agreement with major shareholder HQ Mining has provided a total of $3,670K to date @ 9.75% interest (capitalised). Further loans have been provided by office holders totalling $150K at 9.75% and 12% (fully drawn) and a Facility up to $400K including loans @ 9.5% provided by Martin Place Securities. The further loans are repayable from funds raised from proposed capital raisings.

Subsequent to the end of the June Quarter the Company managed to conclude an agreement with a new financier to provide $1,800,000 in long-term loan funds, the whole amount of which has now been received.

8.	**Estimated cash available for future operating activities**	**$A'000**
8.1	Net cash from / (used in) operating activities (item 1.9)	(130)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(130)
8.4	Cash and cash equivalents at quarter end (item 4.6)	49
8.5	Unused finance facilities available at quarter end (item 7.5)	99
8.6	Total available funding (item 8.4 + item 8.5)	148
8.7	**Estimated quarters of funding available (item 8.6 divided by item 8.3)**	1.1

Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.

8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: Yes, however the Company is planning an increased level of exploration activity across its portfolio when funding allows.

For personal use only

8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?
Answer:	Yes. The Company just raised $1,800,000 long-term loan funds subsequent to the end of the June Quarter and expects further funding will be forthcoming from its capital raising exercise. The Company has appointed Martin Place Securities as corporate advisory to assist with a capital raising subject to Board and regulatory approvals. The Company has also received enquiries as to sale or joint venture of some non-core projects.
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
Answer:	Yes. For the reasons outlined in Q1 and Q2 the Company has a reasonable expectation that sufficient working capital will be available for business operations and exploration objectives.

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 29 July 2021.....

Authorised by: By the Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
